

Normal style - steel wooden armored doors

STRUCTURE SKETCH MAP STEEL-WOOD ARMORED DOORS

▼ Structure Characteristic

Dual-rapidness lock series:
Quick indoor and outdoor locking; unique function of indoor emergency unlocking function; high safety.

New type strengthen gemel:
Up-to-date German technology, 180 degree multi-lock concealed steel hinge avoids operation without noise and won't diverge over a long period of time, better performance against theft.

Luxury frame design:
The strength and the attractive appearance of doorframe could be enhanced by adopting luxury frame and anti-theft dual-layer design. That is, the locking towards the luxury and elegant doors.

Door panel:
It has a strong three-dimensional appearance, adopts imported three-dimensional pressing machine, according to natural wood grain, there is European environmental protection paint on its surface, no pollution and no radiation.

Reinforced side lock point:
It adopts reinforced side lock point to keep the door safe and anti-theft, the lock could use it reliably, safely and conveniently for its separate layer safety, reasonable, it is safer and stouter in lock body.
